

## MLAC

The Mlac settlement has been designed as a community of 30 houses in the proximity of the agglomerated settlement of Ozeljan and will be distinguished from other similar projects by its sophisticated contemporary style, the manner of its construction, and the dedication to its locations environment. The inhabitants of the settlement will live in a rustic setting in the midst of untouched nature near the castle and the castle garden, yet it is only 7 kilometres away from the bustle of Nova Gorica's town centre.

The vision of the Mlac settlement is the formation of a modern and custom tailored harmonious settlement with a hint of urban and contemporary style within the existing rural environment. The guiding principle is to develop residential buildings with their own unique identity that function as distinctive elements within the homogenous composition, yet at the same time, are in harmony with the architectural heritage and tradition of the Ozeljan village.
