

EDA CENTER

The Eda center facility has been designed as the premier business facility in the statistical region of Goriška. On a symbolic level, it will embody a unique identity while bringing forth various content programs. At a functional level, the Eda center will become the economic hub of the region offering new opportunities and creating new jobs and will thus become a gathering point for all citizens of Nova Gorica.

The facility will be comprised of three units: above the spacious and secure parking facilities there will be four storeys for shops, the next eight storeys for offices, and the top storeys with the most dramatic views for the owners of deluxe apartments.
